NEW: Digital tool to install flooring in a virtual room

REGUPOL BSW GmbH is introducing a new tool that allows interested parties to lay their REGUPOL flooring in virtual space.

The REGUPOL Flooring Designer can be found at <https://flooring.regupol.de/>. You can "install" running tracks, flooring for multipurpose game courts, safety floors for playgrounds, flooring for fitness centres and winter sports facilities as well as mats for martial arts areas in various virtual rooms.

This allows users to easily and playfully view different colour combinations or select the floor according to their design specifications. A watch list serves to save the selection. Furthermore, it is possible to order the desired selection as a colour sample.

About REGUPOL BSW GmbH

REGUPOL is one of the world's leading processors of recycled elastomers. They are used to create high-performance sports and safety flooring, antislip mats for load securing, products for impact sound insulation and vibration isolation, well as protective and separating layers for use in construction projects. In many of these markets, **REGUPOL** is now among the leading suppliers or is already market leaders - thanks to the expertise of the global team. Subsidiary companies are: **REGUPOL** America LLC, **REGUPOL** Australia Pty. Ltd., **REGUPOL** Acoustics Middle East FZE, **REGUPOL** Schweiz AG, **REGUPOL** Zebra Athletics LLC and BSW Shanghai CO. LTD. In the past year, **REGUPOL** achieved a turnover of around € 120 million and recycled more than 90,000 tons of elastomers. **REGUPOL** is a winner of the NRW 2020 Environmental Business Award and received Cradle to Cradle® certification in 2022 for several products in the areas of acoustics, construction and load securing. Cradle to Cradle® stands for a continuous and consistent circular economy. **REGUPOL** has made it its task to work continuously on developing solutions in the sense of a consistent circular economy. The company's goal is to shape a sustainable and successful future.
